PANEER SELVAM V

Software Engineer | JavaScript · TypeScript · React · Node.js
LinkedIn | Portfolio | GitHub
+91 7094395837 paneerselvamv4@gmail.com

Skills

- **Languages** - JavaScript (ES6+), TypeScript
- **Frontend** - React.js, Next.js
- **Backend** - Node.js, Express.js, REST APIs, Middleware, API Integration
- **Databases & ORMs** - PostgreSQL, MongoDB, Prisma ORM, Mongoose, Astra DB
- **AI & Retrieval** - LLM Integration, RAG, LangChain, Embeddings, Vector Databases
- **API Security & Validation** - Authentication, Zod , Request Validation, Rate Limiting, CORS, Helmet
- **Tools & Deployment** - Git, GitHub, Postman, Swagger/OpenAPI, npm, Vercel, Netlify, Render
- **Fundamentals** - Data Structures & Algorithms, Object Oriented Programming, Design Patterns, Async Programming

Projects

1. Ben10 Alien Explorer — GitHub | Live Demo

- Built a full-stack application with alien search, series-based filtering, detailed character profiles, user accounts, and saved favorites.
- Developed Assist10, a RAG-powered assistant that provides contextual, conversational answers to Ben 10 questions.
- Implemented persistent chat history, allowing users to revisit previous conversations.
- Optimized data fetching, caching, dynamic imports, image preloading, and UI animations using Lighthouse and PageSpeed Insights.
- Protected user-specific API operations with authentication, Zod validation, relational constraints, and rate limiting.

- **Tech - Next.js | TypeScript | PostgreSQL | Prisma ORM | Astra DB | LangChain**

2. Custom Promise Library — PizzaHub Visualization — GitHub | Live Demo

- Implemented a custom JavaScript Promise library demonstrating state transitions, chaining, asynchronous execution, and rejection handling.
- Built an interactive pizza-ordering visualization that maps asynchronous execution to step-by-step order-processing stages.
- Demonstrated failure handling and order cancellation through interactive workflows.

- **Tech - JavaScript | Promises | Asynchronous Programming**

3. Ben10 Aliens REST API — GitHub | Live Demo

- Developed a versioned REST API for creating, retrieving, and filtering alien records by series.
- Designed Mongoose schemas and integrated MongoDB persistence for structured alien data.
- Implemented request validation, centralized error handling, HTTP status codes, security headers, CORS, and rate limiting.
- Documented endpoints with Swagger/OpenAPI and verified successful responses and error scenarios using Postman collections.

- **Tech - Node.js | Express.js | MongoDB | Mongoose | Postman | Swagger/OpenAPI**

Experience

MERN Stack Intern | Amypo Technologies — **Coimbatore | June 2025 – July 2025**

- Completed a one-month internship focused on learning the MERN stack: MongoDB, Express.js, React.js, and Node.js.
- Gained foundational understanding of full-stack application development through internship training.

Education

Hindusthan college of Arts and Science — **2022 – 2025**
Bachelor of Science - Computer Science, CGPA – 7.4
